| Secondary School Of Certificate [**5.7** CGPA] | |

## SKILLS

**Frontend**   :  HTML, CSS, Bootstrap, JavaScript
**Backend**   :  Python
**Databases**  :  SQLite*

*courses yet to be completed

## CERTIFICATION

| | |
|---|---|
| **NxtWave Disruptive Technologies** | Dec 2020 - Now |

Continuous Capacity Building  program Intensive Bootcamp Trainee
- Developed a Keen understanding on the Fundamentals of Programming with Python.
- Able to build impressive Static, Dynamics and Responsive Website using JS

## PROJECTS

**Countries Search**

Developed responsive countries search application which shows all countries and respective populations in the world. We can also search by specific country
- Fetched countries list from a server asynchronously using fetch GET HTTP API call and implemented responsiveness using Bootstrap grid system and CSS box model.
- Implemented local search functionality by using input element, JavaScript event listeners & filtered countries using the Array filter method.

**Wikipedia Search Application**

Developed custom Wikipedia search application where users can search and view curated results and can see detailed explanations in Wikipedia by clicking on the specific result
- The displayed list of search results with HTML list elements with hyperlink as URL, styled list using CSS, Bootstrap, and implemented responsiveness using Flex properties and CSS Box model.
- Fetched search results from a server asynchronously using fetch GET HTTP API call. When a user clicks on a particular result, opens the website in a new tab by using the target attribute of the anchor tag in HTML.
